Notes : (1) The indices for 1965-66 to 1967-68 are generally based on partially revised estimates while those for 1968-69 generally based on final estimates. The indices for these years are, therefore, subject to revision.

(2) Index constructed by the chain base method to provide for changes in the estimates due to extension in coverage and variation in the method. The indices are, therefore, better indicators than the absolute figures in analysis of the trend in agricultural production as a whole or of any commodity.
