SAN. A—PROCEEDINGS FOR APRIL 1914, No. 12 & 13.

FILE No.  $\frac{S}{79}$  OF 1914.

Council question regarding the percentage of deaths for the last three years in this Province from cholera, plague and malaria.

[No. 12.] Question No. 9 by the Hon'ble Rai Bahadur Nishi Kanta Sen.

The percentage of deaths separately for this Province from (1) cholera, (2) plague and (3) fever (which includes malaria) for the year 1912 only is available from the Bihar and Orissa Sanitary Report for 1912. The figures for the years 1910 and 1911, i.e., before the creation of this Province, have not been separately shown in the Bengal Sanitary Report for these years, but they may be available in the Sanitary Commissioner's office. We may ask that office to supply the figures if they have them.

Council question regarding the percentage of deaths for the last three years in this Province from cholera, plague and malaria.

[No. 12.]

Question asked by the Hon'ble Rai Bahadur Nishi Kanta Sen at the meeting of the Bihar and Orissa Legislative Council held on the 6th April 1914.

9. Will the Government be pleased to state what was the percentage of deaths for the last three years in this Province from (1) cholera, (2) plague and (3) malaria.

No. 13.]

Answer :

A statement is placed on the table showing the death-rate for the last three years in this Province from cholera, plague and fever. The figures for fever include a large number of deaths due to causes other than malaria.

[A—Enclosure to No. 13.]
